

Anjul Chauhan

Software Engineer | Backend & GenAI Development

Haridwar, Uttarakhand | anjulchauhan24@gmail.com | +91 7017575679 | linkedin.com/in/anjulchauhan24
github.com/anjulchauhan24 | anjulportfolio.netlify.app

Summary

Backend Engineer specializing in **Python**, **FastAPI**, **Node.js**, and **MongoDB**. Experienced in building scalable **REST APIs**, **authentication systems**, **RBAC architectures**, **AI-powered applications**, and **real-time platforms**. Developed production-ready solutions with **30+ APIs** and deployed full-stack applications serving multiple user roles.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, Java

Backend: FastAPI, Flask, Node.js, Express.js, RESTful APIs, JWT Authentication, Google OAuth, Socket.io, Pydantic, Nodemailer, Multer

Databases: MongoDB, MySQL

Frontend: React, HTML5, CSS3, Tailwind CSS

Tools & Concepts: Git, GitHub, Postman, Vercel, Netlify, API Design, RBAC, Database Schema Design, Microservices, Version Control

AI & GenAI

LLM & Generative AI: Google Gemini API, Qwen3, Llama 3.2, Qwen2-VL, GPT-2, Prompt Engineering, Retry/Fallback Logic

RAG & Vector Search: Retrieval-Augmented Generation (RAG), Vector Embeddings, Qdrant, Semantic Similarity Search, MiniLM

Agent Frameworks & Deployment: LangGraph, CrewAI, OpenAI Responses API, Hugging Face Spaces, Gradio, Fine-Tuning (LoRA/PEFT)

Work Experience

GenAI & Backend Software Intern – CybHop Tech LLP

Aug 2025 – Present

- Built a scalable **FastAPI** + **MongoDB** backend with **JWT authentication** and **RBAC** for 3 user roles; engineered **30+ REST API endpoints** across auth, course management, and AI modules with **Pydantic** validation
- Integrated **Google Gemini API** for AI-powered user classification with **retry/fallback logic**; implemented **PBKDF2-SHA256** password hashing and a 100-point eligibility scoring engine automating course enrollment
- Designed a **CSV data microservice** with bulk upload, pagination, full-text search, per-row audit trails, and a manager-gated change-request workflow for role-separated data operations
- Designed and deployed **Retrieval-Augmented Generation (RAG)** workflows with **vector embeddings** and **Qdrant**; shipped multiple **GenAI apps** on **Hugging Face Spaces (Gradio)** using open-source LLMs (**Qwen3**, **Llama 3.2**, **Qwen2-VL**) under free-tier CPU constraints

Project Work

Real-Time Livestream Platform with Overlay Engine

Flask, React, MongoDB

github.com/anjulchauhan24/livestream-app

- Built a full-stack livestream platform supporting **RTSP**, **HLS**, **HTTP**, and **YouTube streams** with **low-latency playback** and **real-time overlay management** across concurrent sessions
- Engineered a dynamic overlay engine with **drag-and-drop repositioning**, persistent **MongoDB** storage, and full **CRUD** via **REST APIs**; deployed backend with **CORS** and environment-based configuration

Newbie Launch – Website Agency Platform

React, Node.js, Express.js

newbielaunch.com | github.com/anjulchauhan24

- Developed a full-stack agency platform with client and admin dashboards, **JWT auth**, **RBAC**, **Razorpay** payments, **real-time Socket.io chat**, **OTP email verification**, **Google OAuth**, and **Nodemailer** notifications
- Deployed frontend on **Vercel** and backend on **Node.js/Express** with **MongoDB Atlas**; configured **CORS**, **rate limiting**, **Helmet** security headers, and environment-based production settings

Education

Chandigarh University – Mohali, India

2021 – 2025

- Bachelor of Engineering, **Computer Science and Engineering**

CGPA: 7.15 / 10

Mount Litera Zee School – Haridwar, India

2018 – 2021

- Intermediate & Matriculation

Certifications

- IBM Full Stack Software Developer Professional Certificate** – Coursera
- HTML, CSS, and JavaScript for Web Developers** – Coursera
- Internet of Things (Elite Badge)** – NPTEL, IIT Kharagpur
- Discrete Mathematics** – NPTEL, IIT Ropar
